Title: Save Water

Water is very important in our life. In places left behind like ^(countries in) Africa, do not have enough water to drink ~~with~~, Hong Kong is a lucky place that people will not suffer from problems of water for our daily life. ^(not having enough)

But some children wouldn't cherish what they got. They don't know that they are very lucky to have enough water. Children always play with water in an improper way. Some of them will splash water on each other, some of them will waste a lot of water when they are taking a bath.

Sometimes, adults may also waste water because they don't know how should they cherish water when they're doing housework. Some adults may use the washing machine improperly, like they only wash very less clothes one time and that is also a waste of water.

Water should be saved because it is very important in our life. We need water for drinking because if we don't drink water, we

might die, And people might stink if they do not use water to bathe. Your clothes might also stink if you don't use water to wash it clean.

We can save water by taking a shower instead of a bath and your shower should be short, also washing a lot of clothes one time is also a good way to save ^{at} water.

Actually, there're a lot more ways to save water. Can we all be a "Saving Water Ambassador"? Remember, there is one slogan for that team — SAVE WATER, SAVE LIFE! If we all can save water, the world will be more beautiful and less people will die! Please help people living in poor places, try to imagine that you are ^{people} living in poor and small countries, you do not want your friends or even family to die because of lack of water, right?
