Question

Recently you see this notice in the newspaper, on TV as well as in the MTR stations:

"Reduce, Reuse, Recycle:
The best way for people to care for the Earth"

Then in the English lesson, your teacher asks:

What can Primary 6 students reduce, reuse or recycle? And how can they do it?

He/She wants you to present your answers in an article.

The outline below may help you in answering the questions:

- personal life
- family life
- school life

Write about 200 words. Give your article a title.

END OF QUESTION PAPER

The 3Rs for Primary Six students

Every day, millions of tons of rubbish is produced all over the world. Landfills are being filled up and at the same time running out of space. As a Primary 6 student in the bustling city of Hong Kong, what can you do to reduce waste? The answer is: perform the '3Rs'!

For starters, you can reduce. Reducing the waste we produce every day can help a lot. Think about the things you throw away every day. Plastic water bottles, sheet of draft paper... the list goes on and on. We can reduce them in many ways. For example, you can buy a bottle of water to drink. When it's finished, you can simply refill it and use it again and again. You can also use every single blank spot on a sheet of paper to do your rough work in Mathematics.

Next, you can recycle. Have you ever noticed that lots of soda cans, plastic bottles and paper are thrown away by us every year? By taking them to recycling bins or recycling stations, we can give trash a new life again. For instance, if you take your old school worksheets and finished soda cans to recycling

Candidate Number					Venue	Seat No.

bins instead of to the trash can, there will be more space in the landfills for trash that cannot be recycled. We can also buy recycled products such as recycled paper and aluminium bricks.

Last but not least, we can reuse. Trash can sometimes become useful if you get creative and give it a new look and use. For example, you can turn a plastic bottle into a useful pen holder. Scrap paper can be used as origami paper and you can make yourself some cool and stylish ornaments. You can even turn a soda can into a useful portable barbecue!

Concluding from the ideas mentioned above, trash isn't just something you throw away and forget about it. Reducing the amount of trash in the world would help the environment a lot. What I'm trying to say is, perform the '3Rs' in your daily lives. I am sure the Earth will thank you.
