Dear Editor,

There has been a lot of things happening in our beloved city, a lot of un-civic things. If the people keep doing this, they can affect the name of the city.

People throw rubbish everywhere including the streets, buses and trains. Some people steal, steal from shopping centres, shops and even steal from people, they tend to threaten the innocent people.

Even us, students, do un-civic matters such as bullying. I have seen a boy in our class crying because the students bullied him.

I think people who do such actions are very selfish, unreasonable, mean, bad and other negative words that I can think of. The effects

of these actions can lead to many endings such as smelly streets, polluted air, dirty rivers, terrified people, crying students and

terrible scars. So, I think that we should encourage our fellow students, neighbours and friends to follow the rules and raise

Hong Kong to be a great city that everyone can remember. Surely you don't want us to be the ones who causes our city's downfall,

right? We should encourage people by putting up posters, have small games in school that can teach students to have better

behavior and grow up to help the city, have talks in the streets and tell people every ^{bad} ending that will happen if we don't stop.

So, Fellow students. Follow the rules and be good boys and

girls when you grow up. Lets save the city together! No bullies!
No thieves! No dirty environment! When people come to our city. We
will make sure that Hong Kong stays in a perfect shape so everybody
will remember us as a great city with civilized people.

Yours faithfully,
